Haul	(b) (3) (B) [redacted]	Killer whale (OO)	1	

4 Killed By Gear
Date:
Latitude: Longitude:
Comments: *'Large Male Orca (Killer whale) caught in codend. 704 cm standard length, deep tissue sample, and 15 photos taken. Decksort paused while marine mammal kit was retrieved then continued. Mammal was moved to the side and dealt with after decksort before being dropped off a steam away as not to recapture or risk any other boats recapturing the same carcass.'*

Specimens: *See NDE for full specimens and comments. Animal#: 1, Specimen#: [redacted] 1, specimen: Tissue (code 3), Sex M, Value, Comments:'Tissue sample is larger than a 2 inch by 2 inch square unintentionally. The flesh was difficult to cut with scalpels provided so a "Vicky" was used to aid in cutting. I believe I got to red tissue but it is not an ideal sample. I tried my best under the circumstances. I stored the sample in aluminum foil then a ziploc bag and then a further ziploc bag with a bag and tag seal in the outer bag in a. ***Animal#: 1, Specimen#: [redacted] 2, specimen: Photo (code 1), Sex M, Value14, Comments:'Photos include genital area of marine mammal carcass, head, incision of marine mammal tissue sample being taken, body from above, tail, flippers (one of which has a unique hole in it. I didn't notice until after inspecting photos after. May prove useful for individual identification?), and body/girth.'. ***Animal#: 1, Specimen#: [redacted] 3, specimen: Standard Length (code 4), Sex M, Value704, Comments:'The standard length of the Male carcass was 704 cm long. Curvilinear was not taken as I thought it was one or the other. I would have taken both. Apologies.'. ****
