

Release Notes for Grants Online Version 6.04

Date Deployed: April 26, 2024

1. With the decommissioning of the Grants Online software, users may need to retrospectively view artifacts (e.g., Review Event details, Correspondence & Federal Reports, etc.) created during the Grants Online lifecycle. To enable the user community to view those artifacts, a series of PDFs were created. The PDFs will be stored by category at the location specified below:

/satabackup/grantsp5/orgs

/satabackup/grantsp5/correspondence

/satabackup/grantst5/review_events

NOTE: The artifacts may have been created inside of Grants Online or outside of Grants Online and uploaded to the system. The artifacts may be saved as an Excel spreadsheet or as a Word file. [JIRA: NGO-1378]

2. As an essential component of the Grants Online decommissioning process, all user accounts (Internal Agency staff and Grantee) must be locked and deactivated. The procedures to accomplish this have been developed and thoroughly tested. [JIRA: NGO-1379]
