**Subject:** Trump and his lies.

Dear Mr. Jacobs:

I have to question your disavowment of the inaccurate and downright repugnant falsification of your scientific work by this cretin Trump.

Where is your head at?

Is your job more important than the lies that this absolute failure of human being tells you to do. And you roll over and do it. What is the matter with you as a public servant that my taxes pay for your salary, and expect, no demand you provide the most accurate information?

Seriously, again where is your head at.

A very disgruntled tax payer in Michigan.
