**Subject:** Re: Phone Numbers for NWS Offices

For Raleigh, you could try 919 515 8203, which was the media line when I worked there, or 919 515 8200, which was the office's coordination line. As it's getting close to 4 PM, calling around 4 PM you might get both the leaving day and oncoming evening shifts, based on the schedule when I worked there.

Thanks for reaching out to OPC today. Darin

John, Louis & team,

I made calls today to the Atlanta, Charleston, Columbia, Wilmington and Newport WFO's, the SERFC, and the NHC and OPC ops desk. I couldn't get through to a person at Raleigh, and left a message for Chris Landsea (which was one of the numbers I had). We will see Raleigh next week, but I will call if anyone has the forecast number.

I have to tell you that to a person, the folks on duty were very positive and really appreciated the personal touch on a weekend shift. Several mentioned the All Hands email, and one person said "never underestimate the power of a pat on the back." Many enjoyed sharing some of the tricky elements of the forecast, and we discussed local impacts.

I know we caught them a bit off guard, so also mentioned they could follow up if they had questions.

I know we have folks that are very upset, and others who are understandably very tired. I will say, however, it is incredibly uplifting to also witness first hand the resilience, and positive focus of so many who may not be quite as vocal.

Best,  
Mary

I reached Wakefield, Sterling, Mt. Holly, and Boston - all very appreciative of the call. Boston said they're getting a lot of kudos from their local customers. CWSUs I get voicemail only - not sure how effective it is to leave a message. Could not get through State College or New York's phone prompts to reach a human.

Good morning EC - Following up from the call. Please see phone call assignments below based upon the list below:

Kevin Cooley: San Juan to Birmingham and WPC to SPC  
Mary Erickson: Atlanta to Raleigh and NHC to OPC  
John Potts: Wakefield to Boston

Jeremy is circulating short talking points. I have linked notes from the call below.

Hi Mary and Louis,

Here are the phone numbers for the WFOs, CWSUs, and RFCs that have dealt with Dorian. Additionally, I have listed the phone numbers for the National Centers. These numbers will likely lead to a phone tree, in which you will have to select the option to speak with a forecaster. If you need any additional numbers, please let me know.
