8am. Now CAT 5 with 160mph winds. Track similar to 5am, but shifted a tad west again.

We don't want to sound the alarm just yet because it is only one model cycle (18Z), but the HWRf model came in further west with a shorter time for stall, and projects landfall at Cape Canaveral. The point is FL is not in the clear by any stretch. I'm on the phone with NHC folks now.
