Subject: Re: AL plot (urgent)

We don't produce spaghetti plots with our output because it generates confusion; however, many private sector companies do.

Here is a link to all the 5-day cones:

https://www.nhc.noaa.gov/archive/2019/DORIAN_graphics.php?product=5day_cone_no_line_and_wind

Here is a link to all the 5-day wind speed probabilities for >39mph:

https://www.nhc.noaa.gov/archive/2019/DORIAN_graphics.php?product=wind_probs_34_F120

Here is a link to the archive of all the NHC plots:

https://www.nhc.noaa.gov/archive/2019/DORIAN_graphics.php

In the wind speed probability plot, you can see that Alabama *is* included from advisory #15 all the way to advisory #41. Granted, it never exceeded a 30% chance (light green).

Let me know how I can help with this issue. (b)(5) Do you know what the reason was for the marker on the poster? Perhaps it was with respect to something else? Maybe where Michael made landfall last year?

I believe this was the graphic that POTUS was referencing. It shows AL included in a small (5-20%) but non-zero chance to see winds exceeding 39 mph.

If you need more info, feel free to call.
