63469	Weather	NCEP OPC Marine and ICE Services and WPC Scientific Support Services	The objective of this acquisition is to provide geographic, meteorological, and scientific analyses and evaluations of meteorological data to support the execution of the USNIC mission. These analyses are required in order to provide daily operational global and tactical scale ice and snow products, ice forecasting, and other environmental intelligence services for the United States government critical for maritime safety operations. Output from polar orbiting satellites (POES) and geostationary orbiting environmental satellites (GOES) are the primary data sets analyzed for the generation of snow and ice cover products. In addition, ground weather observations, synthetic aperture radar (SAR), microwave scatterometer returns, numerical weather prediction models, sea ice models, buoys, and reconnaissance flights are also incorporated into the daily snow and ice charts. The contractor shall work closely with USNIC staff to offer sound meteorological interpretation and insight, participate in team meetings, and adhere to established USNIC procedures for snow and ice analysis and data processing.
