Subject: You make us proud - Congratulations

Dear Lou,

I just read an article in the New York Times that you received a standing ovation in a speech in Alabama for defending the integrity of science and the dedicated scientists of NWS.

I also saw a news clip in the national news for your courageous actions to commend NWS scientists. Congratulations. Our field, our community, and our country needs this at this time.

NWS is a science organization, and it is fortunate that a great scientist like you is currently the head of NWS. You have the full support of the entire scientific community. Your steadfast support of science and NWS scientists will go a long way towards maintaining and perhaps enhancing the confidence of public in NWS forecasts and warnings for public safety.

Regards,
Shukla
