**Subject:** The importance of accurate weather reporting

Dear Ms. Roberts-

The American public deserves to know who at NOAA decided to provide false information to the public about Hurricane Dorian. This was UNACCEPTABLE. It gives me chills that political so-called leaders at NOAA would put their own petty political objectives above the lives and safety of Americans. We expect and deserve more.

Did this communication come from your office? If not, from whom was it issued?

Sincerely,

Nicole Bouvier  
Olney, MD
