In case you get questions on tweet:

We don't produce spaghetti plots with our output because it generates confusion; however, many private sector companies do.

Here is a link to all the 5-day cones:

https://www.nhc.noaa.gov/archive/2019/DORIAN_graphics.php?product=5day_cone_no_line_and_wind

Here is a link to all the 5-day wind speed probabilities for >39mph:

https://www.nhc.noaa.gov/archive/2019/DORIAN_graphics.php?product=wind_probs_34_F120

Here is a link to the archive of all the NHC plots:

https://www.nhc.noaa.gov/archive/2019/DORIAN_graphics.php

In the wind speed probability plot, you can see that Alabama *is* included from advisory #15 all the way to advisory #41. Granted, it never exceeded a 30% chance (light green).
