Response to NOAA Statement

The American Meteorological Society fully supports our colleagues at NOAA, who consistently put the safety of the American public first and foremost. They work tirelessly employing state of the art science to keep Americans safe. With respect to the press release that was issued by NOAA on Friday, 6 September, regarding the forecast of Hurricane Dorian, AMS believes the criticism of the Birmingham forecast office is unwarranted; rather they should have been commended for their quick action based on science in clearly communicating the lack of threat to the citizens of Alabama.

Given that we had direction to avoid posting and run through either NWS or NOAA, I pull my thought about pushing the WaPO to NOAA Comms. I like the themes of maintaining focus on operations and avoiding unintended mixed messaging.

Kevin

Louis,

Here is the timeline. I received the message from Susan about the Washington Examiner article. That was the first indication that there was a POTUS post.

After that, I sent the second message for the ROC to send out a message. I coordinated this with Mary via text. The resulting message to the field is the 3rd message below.

On Sun, Sep 1, 2019 at 4:15 PM Andrew Stern - NOAA Federal <andrew.stern@noaa.gov> wrote:

FYI - see article from Washington Examiner from this afternoon. Puts POTUS impact claims against the official forecast and now one WFO is refuting POTUS comments. Just want you to be aware. Need to keep our folks safe and out of the fray.

Ops Center,

Please send out a message to all ROCs to alert all WFOs to only stick with official NHC forecasts if questions arise from some national level social media posts this afternoon. Staff should not provide any opinion about the national level posts and should direct any questions that cannot be satisfied to NOAA Public Affairs. Either have them contact Susan Buchanan (susan.buchanan@noaa.gov) or Lauren Gaches (lauren.gaches@noaa.gov).

Thank you,
Andy

Attention all ROCs and National Centers,

NWS Leadership is asking that we only stick with official NHC forecasts if questions arise from some national level social media posts which hit the news this afternoon. Staff should not provide any opinion about the national level posts and should direct any questions that cannot be satisfied to NOAA Public Affairs. Either have them contact Susan Buchanan (susan.buchanan@noaa.gov) or Lauren Gaches (lauren.gaches@noaa.gov).

ROCs please pass along this message to WFOs, National Centers please pass along to staff working social media.

Thanks,

Shawn Smith

Andy: I was going to offer a modification to your suggested reply below but paused when I read in a later email that these were your exact words. What was going to insert was the word "ongoing" or "developing" between "other" and "severe". To read "...other ongoing severe ..." or "...other developing severe....".

If you want to stick with original, I understand but I thought your point about the other events was important and I was trying to insert a bit more urgency

Louis

wrote:

Susan,

I concur with your assessment. However, it was bigger than just Dorian. We had wildfires ongoing in the west, developing tropical systems in both the Atlantic and Pacific basins and had other areas of thunderstorms to watch. I would modify it slightly. Our mission is supposed to be apolitical.

"NWS leadership sent these directives to field staff so they (and the entire agency) could maintain operational focus on Dorian and other severe weather hazards without distraction."

Subject: TIME SENSITIVE inquiry from WaPo

Hi NWS press folks and Director Uccellini,

This is for a Washington Post story ****running imminently online and in print on Sunday.****

On Sept. 1 and again on Sept. 4, NWS personnel received a guidance not to provide opinions on national level social media posts in the media and to stick with NHC forecasts if questions arise about the posts.

Staff understood this to be a response to President Trump's Alabama comments and that they were essentially being told not to contradict the president.

Can you respond to this and explain the reason behind sending these dual directives?

Please send any responses to Colby and myself. I'm cc'ing Jason as well who has been working on this story.

Thank you and all the best,
-Andrew
