Chris,

My cell is (b)(6)

If needed give me a call. I'll put your cell in my phone.

Chris

It was 10:11 Central Time before the Spann tweet.

I'm actually on leave today.

Thanks....and that would be central time?

I noticed that the Tweet had a time stamp of 8:11 in your attachment, but I when I go to the WFO's Twitter feed it shows 11:11am

If you can chat, I'm at 202-482-3978

Thanks!

Chris,

You know, I've never noticed the oddities of the time stamps but now that you mentioned it. Going back and looking at them they are definitely off. The tweet, from what I understand, went out at 10:11 AM. That matches the FB post time (see attached). The settings on tweetdeck must be off.

Talking to the day shift, somewhere between 9 AM and 10 AM the phones started ringing off the hook with people asking questions about why/when the forecast had changed and when Alabama would be impacted. We also received several direct messages on social media.

That prompted the tweet/FB post.

The staff didn't know about the POTUS tweet until James Spann direct responded to him. That showed up on our wall. That was some time later from what I understand.

Thanks...are the time stamps Central Times?

And how many calls/inquiries were coming in that prompted the Tweet? Did the office see James Spanns Tweet too?

Everyone,

First off, I hope everyone is having a great holiday weekend.

Earlier today, the BMX office started receiving an inordinate number of questions concerning Dorian and potential impacts in Alabama. The day shift did not know what precipitated this escalation in calls/social media questions, but deemed it prudent to provide some type of clarification on official social media channels.

Thus, the attached tweet and FB post (screen captures) were posted. These were shared/retweeted by numerous sources including local media and eventually

regional/national outlets. It was later learned that the uptick in calls/concern regarding Alabama may have been related to a White House tweet earlier in the day.

Some in media assumed, understandably so, that our social media posts were a direct response to the WH post. In fact, they were not as we were not even aware of them at the time. It was directly in response to the increase in calls from anxious and panicked citizens and core partners. The state of Alabama and the Gulf Coast has been through a tremendous amount in the past 12 months, and it's understandable that folks are on edge.

Our job is to provide forecasts and weather information in ways that supports core partners and benefits the lives and safety of the US citizenry. That is clearly what we are doing, and kudos to the day shift for reacting to a need quickly. I did ask that we remove the term "WE" from our social media posts (after coordination with SR) and that was done for the editable FB post. Of course the tweet had already been picked up by many media outlets and deleting it would cause more confusion.

If we get any calls or questions about this, please forward them to me. I have cc'd SRH and also Susan Buchanan for their awareness.

Thanks!

Chis
