got it. Coming to you shortly.

It will come from MW and **WILL NOT BE LABELED DRAFT.**

DON'T WORRY.

It will ONLY go to you.

Jerry

Hi Jerry- Can you send a mock up email of this to me? Note the embedded hyperlink at the end of the first graph.

Subject: Statement from NOAA

Body:

Statement attributable to a NOAA Spokesperson:

From Wednesday, August 28, through Monday, September 2, the information provided by NOAA and the National Hurricane Center to President Trump and the wider public demonstrated that tropical-storm-force winds from Hurricane Dorian could impact Alabama. This is clearly demonstrated in Hurricane Advisories #15 through #41, which can be viewed at the following [link](#).

The Birmingham National Weather Service's Sunday morning tweet spoke in absolute terms that were inconsistent with probabilities from the best forecast products available at the time.
