Subject: NOAA lost its integrity

"The National Oceanic and Atmospheric Administration (NOAA), a powerful U.S. scientific agency, took the unprecedented step today of criticizing one of its own meteorologists for publishing an accurate weather forecast.

In doing so, NOAA effectively politicized the weather report, taking the side of President Donald Trump over that of its own professional scientific staff. It did so with a brief statement, published at the end of the work day today, that was not signed by Neil Jacobs, NOAA's acting administrator."

Seriously? You compounded a lie - and a stupid lie at that. Where is NOAA's integrity?
