Subject: The shameful genuflection by the NOAA

Mr. Feltgen,

As if the presence of a unrelenting hurricane last week were not stressful enough; the foolish and ignorant and cartoonish actions and words by the POTUS – gone unchecked by your organization that disgraced itself in full view of those of us affected by such storms has done irreparable damage to the credibility of your organization. It is a real shame. On the outside – it could appear as a small misunderstanding but the fervor at which it was defended while we were in full swing of a hurricane event make it even that much more despicable.

Someone(s) ought to resign over this.
