Subject: Presidential Weather Report

Director McClean,

Thank you for standing up for your agency and your staff. The moment I saw Trump's prediction, I checked screen shots I had taken of Dorian. Without a doubt the President was a Day Late and a Dollar Short, which amounted to yelling FIRE! in a theater (of operation) he had no clue about. If NOAA does not stand for Science over politics NOAA's purpose will be null and void. The same will be true for the European Agency and the rest. TRUMP **MAY BE a president** BUT HE IS DEFINITELY NOT A METEOROLOGIST!

I live in Port Charlotte FL. I went through Hurricane Charley. All of us out here need your expertise to assist in making very serious decisions.

If Trump had not been on the golf course yelling Four, perhaps he would have known what a CAT 5 is and that Dorian had made a right hook shot off the Greens of Freeport as he was puttering around with an outdated map of the course.
