Subject: Fw: Dorian and Alabama

Have been reading the coverage about Dorian and Alabama and was dismayed to read your organization released a statement contradicting the NWS, and the spokesperson couldn't put there name to it. Makes your organization seem like a bunch of political hacks. I've been using your weather app on my phone for a number of years, I'll be removing it after clicking send. It's sad to see how the people in government are destroying this country for their own benefit, or the benefit of their comrades.

Best of luck.

Robert
