Hi Sue- although we won't have someone available tomorrow, here is an agency statement on this topic:

NWS leadership sent guidance to field staff so they (and the entire agency) could maintain operational focus on Dorian and other severe weather hazards without distraction. The guidance made no reference to the president. -NWS Spokesperson

Hi Dennis;

I'm writing from Newsy Television. We are wondering if you would have anyone available for an interview tomorrow morning by Skype? We want to ask about your opinion NOAA siding with President Trump in their Hurricane Dorian forecast? We could do it any time between 9 and noon ET. It would take 15 minutes.

A little about us:

Newsy is a national news network reaching 40 million homes that's owned by Scripps. We can be seen on numerous digital outlets, including Roku, Apple TV and Amazon Fire TV, which last year generated more than 1.3 billion views. We also recently launched a cable channel, which is available on several platforms, including Comcast/Xfinity, Cox TV, Verizon, and Sling TV. We have more than 1.2 million Facebook followers.

Thank you for considering this,
Sue
