Subject: I could be wrong, but . . .

It would appear from your most recent employment that you were the one(I hope only one) to deliver the anonymous statement that threw the Birmingham weather station under the bus to try to support the president* who is so ignorant and damaged that he can't admit he MADE A MISTAKE.

If you are a party to this you have dishonored NOAA, the NWS and yourself. You are also responsible for propping up the narcissism of the president* who is obviously a danger to this country, to this world and to me personally. If you have done this, you are complicit in the destruction of our democracy and I sincerely hope you will have to account for this treasonous activity.
