Subject: Re Florida

Hello, I live in Florida , I'm a fourth generation Floridian , and I always use the information from NOAA before a storm. The letter that left your offices recently that informed us that Alabama was in danger of a hit from Dorian is sad comment on your job and on a fine agency that keeps all of safe. I urge you to refute this letter and restore the dignity of your office and of NOAA.

Sincerely
Pam Turlington Llorens
