Subject: Politicizing weather now?

Are you people seriously attacking the NWS for ACCURATELY informing the people of Alabama about a hurricane? And for what? A mentally ill useful idiot with a sharpie habit whose entire mission is to sow chaos and distrust across our government? What the fuck is wrong with all of you? None of your jobs are more important than American lives. Ever.

I don't care who his absurd little political appointees are. This is disgusting and either the rest of you stand up to this or just hang it up because once our trust is gone, you won't get it back.
