Subject: Resign

Do this now! Resign NOW. Testify.
julie.roberts@noaa.gov, Neil.jacobs@noaa.gov

What's wrong with you? You need to resign NOW.

The president made a simple mistake September 4th in including Alabama in the path of great danger;
“would most likely be hit (much) harder than anticipated,”

Any normal president would simply admit to a small mistake, but President Trump could not.

He obviously pressured you to defend him, and you acquiesced to that pressure.

We need to have confidence in our scientists and weather forecasters, so we can trust their warnings.
You have destroyed that trust.

Seriously, you should resign NOW and voluntarily testify to Congress that somebody above you (name the names) either directly or indirectly told you to support this lying president's tweet about Alabama.

Stand up for your country. Do something morally right.

Sincerely
