Subject: Your recent "re-do" re Alabama

Julie Roberts

I am so very embarrassed that a woman of your capability would cave into such silly, "re-truthing" of NOAA weather. As a longtime mariner, making my living on the oceans in Alaska as a fishing boat captain, I truly CARE that your weather predictions are as accurate as possible; regardless of what the President says. Please reconsider who depends on NOAA weather and don't cave to the political pressures of someone who does not really depend on your advice.
