Dr. Jacobs,

It is with extreme dismay and disappointment that I read about NOAA leadership throwing its own amazing employees under the bus and seeming to cowardly agree that President Trump correctly stated Hurricane Dorian will impact Alabama. Shame on you and your staff for promoting this out and out fabrication.

I call on you and others responsible for this reprehensible act to step down from your positions as government employees immediately. You are all a disgrace to what has been the best of the best at NOAA and these United States of America.
