Subject: the "counterfeit" weather map
Importance: High

Ladies and gentlemen of NOAA,

As an avid scientist and observer of weather, I always appreciate the great and accurate job you do. You save lives.

However, the optics of this weeks fiasco with Trump "counterfeiting" a weather forecast are very disturbing!

No one is above the law, may I remind you as an American citizen, so you must handle this action by Trump in the correct manner, not in the proper political manner.

If you don't stand up on this, you will lose the confidence of the public who rely on your expertise. Don't disappoint us, the scientific community, with such casual disregard for a very serious matter.

We will look to see this corrected asap and clarified to all, and that the Federal Law that supports your National Weather forecast is 100% UPHELD.

Thank you,

Trudy J. Richardson
