Dear Sir,

What you have done at NOAA in throwing real scientists and science under the bus will never be forgotten in the history of this country, and you should never forget it, either. For the rest of your life, you should reflect on the lack of character and judgement that led you to turn your back on science, the truth, and your fellow citizens. And for what? An "acting" position under the worst, most mendacious, most dangerous president this country has ever had! The citizens of this country and of the civilized world are outraged by your actions. You should resign now, apologize, and change your life to find a better way before it is too late for you and your loved ones.

Sincerely,

Heather McAlpin
