Dear Dr. Jacobs,

I was very disappointed to see the NOAA release contradicting an accurate statement by your Birmingham AL office. This seems to be blatant politicization of part of our government. That is against how our democracy should work.

If not supporting scientific facts is acceptable to you then everything is fine. If not, time to think about what to do going forward. Please don't let the American people down. Feel free to follow up with me using your choice of methods.

Kind regards,

Richard C. Jones
