Subject: Disgusting

As a former US Navy Aerographer, and someone who helped study and develop storm tracks in the Pacific in the 70's - I'm disgusted you threw all your scientists, reputation, and good will under the bus. Rumors of you telling employees not to comment on the potus' insanity smacks of political obfuscation. And clearly, walking back your orgs statements to support lies is a political act. You messed up. How can we believe you now?

You and your staff are cowards - stick to science please.

Chris - US Navy Fleetweacen, Pearl Harbor, Vietnam
