Subject: Re: Baseline question

Thanks, Barry -

Howard, Rosalie (and hopefully Keifer) and I have been working on a stand alone WOA section. We hoped to discuss that with you on call this afternoon in addition to the status of the revised baseline section, which is on Howard's list. I haven't seen a revised version of that though I believe it is slated to go to Reclamation tomorrow. In seeing their comments on I and S on winter run that came in last night, they still want us to call all temperature effects as beneficial - so there is a fundamental disconnect. My recommendation is we have an internal call on this asap. Perhaps we can move up the afternoon call, Howard?

However, Paul brought up yesterday that they are interested in seeing the main baseline section after we make edits. I am hoping that is a separate piece and can be shipped over to them this am, while we continue to discuss the language for the effects section. He was stating that that section hasn't changed at all for FWS since a month or so ago.
