**Subject:** Re: ROC on LTO Draft Species Briefing Papers

Howard,

I'm fine with you sharing these with BOR and Paul sometime after the call today.

Thanks - Barry

Barry,

Attached are four species briefing papers that highlight key effects from the NMFS Draft BiOp. The species addressed include winter-run, spring-run, steelhead and Southern Resident Killer Whales. The green sturgeon paper is still in the works, but probably not necessary to share because we have not highlighted any concerning effects in the analysis that will rise to the level of elevation.

I am available to discuss before our Wed Director call if you would like to go over these at all.

Howard
