Subject: Re: ROC FAST TURNAROUND METHOD NEED

No thanks I don't want to use IFIM/PHABSIM on the Trinity River for several reasons, including those detailed in the attached paper.

All --

Please see the attached list of WUA and IFIM related methods. This is in response to an initial request from us to ICF. The green rows are more specific to our request, and the rest are similar/related by weren't asked for specifically.

Please respond by noon tomorrow with an indication of methods that you would like completed for your division.

Note that the last column is ICF's take on the method -- if you have more "on the ground" or update knowledge that differs, you should defer to your own expertise.

Let me know if you have any questions.

Thanks!
Cathy
