Subject: Re: ROC action area and species to consult on

Hi everyone,

Hope you all had a great Thanksgiving. Yes, please include Pacific eulachon along with SONCC coho. I assume Southern Resident killer whale and green sturgeon sDPS are also already included.

Thanks,

— Trinity species:

++ The 2008 BA included SONCC coho salmon, so that shouldn't change for ROC on LTO (we just didn't complete the TRD consultation in our 2009 BiOp).

++ Justin—should we include eulachon?

— ESA:

++ “DPA” should be “DPS”

++ Should include Southern Resident (SR) killer whales

++ Also designated critical habitats for all listed species except for SR killer whales

— EFH: add:

++ Coastal Pelagic species

++ Pacific Groundfish species

Justin -- What do you recommend as a "species list" within the action area affected by Trinity Division operations?

Garwin -- Any additional suggestions?

Luke -- Because my understanding is that the Proposed Action for the current reinitiation effort includes Trinity operations (not evaluated in the 2009 BiOp), that will likely expand the species list compared to what we evaluated in the 2009 BiOp (e.g. likely adding at least SONCC coho, based on the species considered in the TRRP BiOp). I defer to Justin Ly at our Arcata office to weigh in on that. For CVP/SWP ops within the Central Valley, I suggest considering the species evaluated in the 2009 CVP-SWP BiOp (see cover letter attached):

For ESA:

Sacramento River winter-run Chinook salmon

Central Valley spring-run Chinook salmon

Central Valley steelhead

Southern DPA of North American green sturgeon

Central California Coast steelhead

**For Essential Fish Habitat Conservation Recommendations, under Magnuson-Stevens
Fishery Conservation and Management Act:**

Pacific Coast Salmon species

Hi Barb,

Katrina is having me work on developing a species list based on our action area for the ROC. Attached is what I generated through IPaC for USFWS. Do you have any thoughts on NMFS species?

Thanks,
Luke
