June 14	134	document	prepare final document
June 15	135	Final BiOp Issued (June 15 Saturday,	Final BiOp issued
		June 17 rollout?)	

## Assumptions for FWS BiOp:

- Peer review only for aquatic species

<sup>-</sup>Peer review conducted using private consultant: need to confirm contract availability and time frame for review

- Figure out best coordination with NMFS (2 consulting firms? Successive reviews?)
- -No Washington Office review
- -Proposed action results in non jeopardy/adverse modification findings (if RPAs will take additional coordination time with action agency and between NMFS and FWS)

Assumptions for NMFS BiOp:

Peer Review through private consultant

All components of schedule hold
