

1. Overview of the Shasta/upper Sacramento River models the SWFSC is developing: general purpose, current status, and ETA for completion.
2. SWFSC feedback on Dea's Model
3. Integration of Dea's model and SWFSC models
4. What would we need from them for the ROC?
5. Does the SWFSC need anything from CVO in order to complete or implement the models (e.g., data from Reclamation, funding, deployment of the temperature buoy in Shasta Reservoir)?
