Subject: Re: PLEASE RESPOND -- WUA AND FLOODPLAIN ANALYSIS

I just filled in the WUA tracking, but if there isn't time to make the exceedance plots, then there isn't time.

Yes, which is why I was trying to prioritize....seems like most people aren't using them.

On Tue, Mar 26, 2019 at 4:23 PM Barbara Byrne - NOAA Federal <barbara.byrne@noaa.gov> wrote:

Cathy, is it correct that the exceedance plots might take SEVERAL DAYS to generate? Because of that timing, I'm declining them. Might be something for others to consider....

So that I can prioritize and summarize our needs on this, please check this out and correct/fill in if needed.... this is a task that should only take two minutes, I promise!

One followup...if the answer to my question is Yes, let me know if you used/planned to use the exceedance plots.

Thanks.

PS I have some stress balls in my office, you can throw them really hard at the wall and it doesn't hurt anyone. A friend told me....not that I've done it myself....

All --

I just got word that the WUA and floodplain inundation results were grouped incorrectly wrt water year types.

PLEASE LET ME KNOW ASAP IF YOU USED THESE SO FAR, OR IF YOU PLANNED TO.

I have some updated results.

I understand that this is frustrating.

For now, just let me know if you used either of these so far in your analysis or if you planned to before finishing on Thursday.

Stay strong, friends!
Cathy
