**Subject:** Re: Updated figure for Temperature Tiers from Reclamation

This way actually makes more sense, because tiers 2 and 3 apply anywhere within their respective spaces.

**Subject:** Updated figure for Temperature Tiers from Reclamation

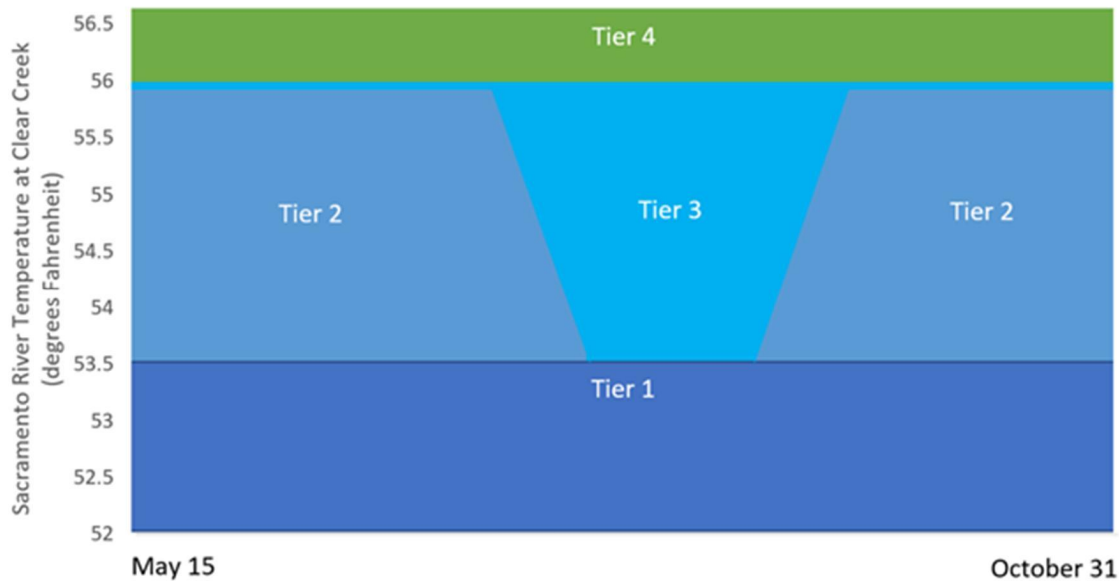

See forwarded e-mail. I still find it strange to label the "space" rather than to label sample lines, but it is what it is.

Hi Howard -

Attached is a revised Figure 4-3. Hopefully this is clearer. I've asked Mark Westbrook to clean up the maps and Steve Micko to provide the additional temperature data / plots. They should be sending things over soon.

Good luck with the BO! I will be teleworking a bit in May and June, but won't be back until June 25. I will miss working with all of you!

Thank you,

Katrina Harrison

Hi Katrina,

I understand that you are going on what is probably a most needed extend period of leave. I am jealous right now! We queried our team to see if there is any technical support they might have, in terms of updated figures, tables or data requests, so that we could share that with you in high hopes that you might be able to help us out before you leave. Attached is what our team came up with. I will be on leave for the rest of the day, but if you have any questions about priority or anything else, I would suggest contacting Garwin.

Enjoy you time off, you will be missed!

Howard
