Subject: RPAs and baseline

Talked to Garwin about 09 RPAs in the baseline.

-RPAs that were not completed or addressed are in the baseline and stated as such (*geomorphic flows; temperature model; long term flow prescription*)

-RPAs that were completed or carried out are in the baseline (*pulse flows, base flows and temperature managment*)

-If RPA actions are continued to be proposed, they are part of the PA (*all of the above actions except the temperature model and long-term flow prescription, which were dropped*). Geomorphic flows are different because of the magnitude proposed and option for mechanical mobilization.
