Same old same old, Danner asking me for money... ;)

I'm glad something from CWF is still useful!

I just spent the last two hours working on this. You will get a bill in the mail tomorrow.

Cathy - give me a call whenever you have a chance - nothing urgent at all.

Eric

Perfect.

Eric you're off the hook. Sorry for the unnecessary request

Evan

Check this out, from CWF BA App D, but provided by Dave/NMFS to Rec in development of the CWF BA. Note especially the last page.

Hey Eric,

Can you provide a "correction" to compare DAT against 7DADM criteria or thresholds?

I'm doing my best to assess temperature effects and Reclamation has used the 2003 EPA region 10 water quality criteria as thresholds for various effects. The problem is that they then use the 7DADM criteria to assess modeled average daily temperatures.

The simpler the correction the better (for me), but if it's helpful/more exact the time period I'm looking at is May 15 - October 31, and the locations are Clear Creek (CCR), Balls Ferry (BSF), and RBDD (RDB).

Thanks
