Subject: Re: [EXTERNAL] Shasta Modeling Questions

Hi Derek --

These changes are very helpful. I suggest we adopt this as items to look into, with the assignments you have indicated (the only revision I have is for Item #1 -- I'll reach out to Reclamation on that and the other items).

I know you have some items to address at Barb's request, and I think that those should be the priority. But after that, can you start on these questions? You have already answered some of them, as evidenced by my email, and I appreciate the nearly "real-time" answers. For a cleaner documentation and record it would be helpful to compile your answers to these questions (and others you took out of our meeting) into a single document.

Do you have the bandwidth to get started on that approach? Do you see any problems with that?

Thanks!
Cathy

Hi Cathy,
Thanks for the unfounded vote of confidence! :) Here is your document with my suggested edits.
Derek

All --

I've reviewed Maria's Shasta modeling notes/questions to try to get to a specific question, and to try to designate whether they are something to ask Reclamation to do or to potentially have Derek look into.

Derek, can you take a look at this and see if there is anything that seems to mischaracterize what we talked about last week for any questions that we did talk about? Can you also review to assess your ability to address the questions that I have designated for you?

We could meet later this week to talk through some of this, but I do need to be protective of Evan's time right now since he has an effects analysis deadline. Let's converse a bit over email initially and then I could identify next steps and timeline.

Thanks!
Cathy
