**Subject:** WRLCM model results for spawner declines of 10% ROC\_AR\_DPP  
**Attachments:** Draft Table on Prob of Decline Events 6May2019.docx

Hi Cathy and Evan,

Please find attached a word document with the preliminary analysis of the decline in spawner abundance over different lag periods (1, 4, 12, and 20 years). Please take a look and let me know when you would like to discuss. I am available most of the remainder of this week with the exception of Friday.

Best,  
Noble
