Evan and Sarah -- Can you please prepare a Word doc of questions (should be able to pull from your sufficiency review) for next Tuesday's Shasta calls? I would suggest putting together a single document, but with two sets of questions under separate headers: "Shasta Storage Management and Allocations Logic" and "Shasta Temperature Management".

Because our concern about storage management is a lot about temperature, our conversation may touch on both categories during both calls, so will be handy to have all the questions together in one document. Because of broad interest and importance, might be useful to touch base with at least Garwin on Monday afternoon before sending out to the meeting participants.

I can try to capture the resolutions during the meeting for the post-call summary so you two can focus on the conversation.

Attached is the example of the questions list shared in advance of our Trinity call this morning.
