Subject: Re: First (limited) look at Shasta

Right, not totally done. I'll let you and the group know when we have boilerplate for that. But feel free to put in your own in the meantime if it would help to quickly "convert" it to whatever we land on.

Yeah thanks,

about the summary sentence: I guess I was waiting for the correct terminology from the AA. Is that done? or can you let me know when it is?

Evan

I think I this looks good and I know you've done some work since. The only thing I saw missing was that summary sentence of effect to feed into the I&S.

Good work, keep on keeping on!

Hi Cathy,

It's early and pretty rough but attached is my start on the Shasta effects section. It only includes: seasonal operations>winter operations>winter - spring minimum flows.

This is really just an example of how I plan to go about doing this, as there is some additional information that could/will be added (WRLCM habitat capacity, "response" categories, additional support, etc.). Also the the highlighted text is lifted straight from the BA PA description and when/if there's time I plan to revise it.

Evan
