**Subject:** Re: ROC LTO - Shasta temp management

Doing my utmost to keep this response professional:

That is the way it's written in the BA/PA. It's what Reclamation is proposing and I don't know that we've agreed to anything. Throughout the PA there are sentences or clauses like that that add to the uncertainty of operation.

On Tue, Apr 9, 2019 at 11:34 AM Brian Ellrott - NOAA Federal <[brian.ellrott@noaa.gov](mailto:brian.ellrott@noaa.gov)> wrote:

"Temperature management would conclude October 31, or when the monitoring working group determines based on real-time monitoring that 95 percent of winter-run Chinook salmon alevin have emerged, whichever is earlier."

Is this 95% emergence point something we have agreed to?; is it a new proposed operation?
