Subject: Re: ROCON TDM box plots

Oh and just to clarify,

in the box plots the horizontal line in each box is the median and the 'X' is the mean.

Evan

Hi Cathy and Howard,

Attached is a pdf with two box plots showing the temperature dependent mortality by tier. The first figure is just the PA and both models, the second has the PA and COS, and the third figure is just the PA again but I included the data labels.

Let me know if this isn't what you want need or if I need to change it in any way?

Thanks,
Evan
