Subject: Draft Shasta Division Effects Analysis for Limited Distribution
Attachments: 2.5 and 2.6 Upper Sac Effects V12_ForDistribution.docx

Howard --

Attached and saved on our server is a draft version of the effects analysis for the Shasta division. While this is a clean copy with no comments or track changes, it has not been cleared yet by our internal regional QA/QC process. It is therefore subject to revision and modification and, as I understand it, will be provided to Reclamation as a courtesy of the ROC LTO consultation.

Please let me know if you have any questions.

Thanks -
Cathy
