Attachments: Shasta Division Effects Summary Table for Evans review.docx

It's a beautiful day in the neighborhood. Thanks for updating the table with the beneficial approach and pulling the uncertain rows back in.

I made some changes in response to Garwin's comments, and re-ordered the rows following what Joe did for steelhead (high stressors and benefits, med stressors and benefits, low s's and b's, uncertain, NA) and would love to make sure you're good with those changes before it goes to Reclamation tomorrow.

Do you have time today to give the attached table another review? I think the priority on this means you have time, but maybe not. Let me know.

Thanks,
Brian
