**Subject:** Re: Winter-Run info in the SOS

Hi Page,

Winter-run return values were taken from JPE letters. It's CDFW's estimate for total winter-run escapement they calculate each year. I've added return values to the sentence below.

The 2018 adult winter-run return (2,458) improved from 2017 (1,155), though similarly dominated by hatchery-origin fish [\[NA1\]](#).

---

[\[NA1\]](#) This is comparing to 2017 without mentioning 2017 data. Please state that first.

Kristin

Hi Krisitin,

I'm working with Brittany on updating the SOS for ROCon. Naseem commented on page 3 (attached) about having 2017 and 2018 number for winter-run returns. I found a CDFW report for 2017 returns but I can't find anything about 2018. Where did you get your info?

Thanks,  
Page
