Subject: Re: ROC LTO Analytical Approach

Thanks Brian. As an fyi for you all -- I appreciate receiving links to the google docs/sheets because I do not get notices when they are shared with me. Curiously, the google links I have received from Evan and Brian allow me to view the document but not edit the document. I think the docs/sheets need to be "shared" with me in addition to sending me the link. Thanks for keeping this in mind when sending me items for review.

Thanks,
Rosalie

Thanks for the heads up. Here's the draft doc for the Environmental Baseline memo to the file in case you want to pull in the conceptual model. Naseem and I revised the model a bit from the one you initially created. The memo hasn't been reviewed yet, but Howard and Garwin saw it yesterday and seemed to be initially good with the conceptual model. Howard also asked that we share it with Rosalie for her review. So here you go:

Hi all --

Just a heads up that we on the ROC team are trying to get a revised analytical approach to you all (perhaps not at the same time) in the next few days for a quick review and turnaround. I wouldn't consider this the only shot for review, as there are placeholders/"updates pending" for several sections. But we thought that you could focus on the other sections during this review.

This is based on the approach for CWF, with some modifications to hopefully add clarity and update for any changes since June 2017. We can provide track changes so that you see the revisions (because we were all totally cool with the CWF approach!)

So, stay tuned...
Cathy
