Another thought, which you may have already had....

You could use/cite to the monitoring summaries in Figure 1 or Tables 1 and 2 of Johnson et al 2017, attached.

Hi Jeff and Barb,

I would like to attach a table of fish (salmonid, sturgeon, smelt) monitoring efforts throughout Central Valley to the JPOD Fish Protection Plan. The purpose of the monitoring table would be to serve as a communication tool of what monitoring efforts are necessary for specific JPOD actions, and to address a comment that Garwin made about the JPOD Fish Protection Plan. Garwin had commented that " -- *Various locations in the attached Fisheries Response Plan identify current monitoring projects/programs, but some of those projects/programs do not have long-term funding commitments. Reclamation should specify the monitoring and funding commitments, and what would happen if a specific monitoring project/program is no longer funded, but mentioned in the Fisheries Response Plan.*"

I found a lots of good information in the table at the end of the attached CDFW report, and I have some information on monitoring through IEP. However, if you know of a comprehensive table that already exists that I could use/adapt, could you please send it to me?

Thanks,
