Jeff, I tried to incorporate the info in your comments along with my thoughts for some specific inline edits to the elevation doc (forwarded again here). Can you please take a quick look and see if there is anything Delta-related you'd want to fix, recharacterize, or add?

My edits attached. I tried to make inline edits for you to consider, with additional explanation in comments. While the base document has only Garwin's edits, I looked at Jeff's and Evan's comments and tried to incorporate them into some of my inline edits.

Not sure is ripe for Director-level conversation yet, but might be worth discussing how FWS/NMFS are working with "programmatic" PA elements and to what extent we are relying on those elements in our jeopardy analysis. Maybe for a future elevation, but came up as I was thinking about what we "needed" for a programmatic version of Shasta Dam Raise.

Hi Howard,

Here are my comments based on a quick review of your "asks". See the comment bubbles to the side and track changes.

Folks,

I am working on the agenda and list of issues that are going to be elevated at 3-directors meeting on Friday afternoon and I need some help from you.

Could you please have a look at the attached high-level issue tracker and update this where I have indicated that I need some information from you. Check the red text. I need to make sure that the issue is clearly described, that we are specific about why it is important, and that we have a proposed resolution described.

I know you are all busy, but could you take some time right now to address my questions in the attachment and get it back to me? I am briefing Maria and Barry on this tomorrow at 1:30 and need this back from you asap (in the next 2 hours if at all possible).

Thank you!
